

Vehicle

Tea tree perfume

instructions for use for car disinfection and air conditioning / odor removal:

1. Close all windows and start the engine.
2. Animals and people must leave the area to be treated.
3. Turn on air conditioning, set to recycle mode lowest heat and highest fan blast
4. Shake well for 30 seconds before use.
5. Place the spray can in an upright position in the rear footwell and see that it is not obstructed in any way.
6. Press the release valve all the way down until it clicks into place. The box then empties the contents automatically.
7. Get out of the vehicle and close the doors.
8. After emptying the spray can, let the air conditioner run for another 15 minutes.
9. Open the doors, switch off the engine, vent and let the steam escape completely before entering the vehicle. Any residue, wipe off with a clean cloth.
10. Dispose of used boxes in suitable waste.

Caution: When the outlet valve button is locked, emptying the contents of the spray cannot be stopped until it is empty.
